

Successful transition cow management through precision supplementation

Reserve your calendar now for February 26 at 10:00. Ogame Institute is within the frames of IoF2020 organising a webinar with the above-mentioned title. A detailed programme and a link to registration is available from <https://www.organe.dk> under "WHAT'S NEW".

LOCATION

A link to the webinar is sent to registered participants at least one day before the webinar.

AGENDA

The perspectives of Automated Precision Supplementation (APS) for the dairy production is outlined in a keynote speech given by Dr. Ole Lamp, Training and Research Centre Futterkamp of the Agricultural Chamber of Schleswig-Holstein.

Company representatives will explain about their supplements and feed additives to reduce climate impact and environmental loads of the dairy production, as well as giving better resource economy and animal welfare.

A dairy representative will explain, how the concept fits with consumer preferences.

DATE & TIME

26 February 2021 at 10:00 CET
